Alexandria, VA 22313-1450

BY FAX: 571-273-8300 and mail

Dear Ms Doan::

The issue fee on this application has not been paid which under section 1302.04 permits an Examiner's amendment. Per our phone interview of December 8, it was agreed that in order to assure proper support for the allowed claims that you would enter an Examiner's amendment to the specification, which specifically stated in the specification that the features of the first and second embodiments can be combined.. It is believed that such a combination is clearly supported by the specification, but should be specifically stated so that there is no question whatsoever as to such support for the claims.

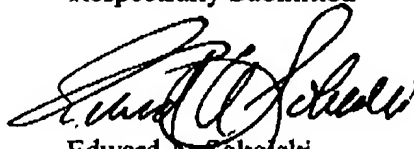

It is suggested that the amendment be entered on page 5 of the specification after the first two lines ending in "in the mask" as follows---The features of the first and

DEC 08 2006

second embodiments can be combined to make for a device which has both receptacles and a mask with images in the shapes of the various portions of one's face---

Your cooperation in handling this matter is appreciated. If there are any questions with regard to this matter, please call me.

Respectfully Submitted
